## News Flash

May 2007

FlashCo® Manufacturing, Inc. is excited to announce its new line of Roof Flashings guaranteed to last the life of the roof.

FlashCo® has engineered a product line of newly designed roof flashings, pipe jacks, or pipe boots that are waterproof and stronger than ever. We are so confident in our **Lifetime Flashing™** that we back it with the *only* 50 year warranty available for a roof flashing. FlashCo® Lifetime Flashing™ material is specified to ASTM B749-85 and alloyed for roofing applications.

Our newly designed joint is waterproof. We have wrapped the base up into the riser increasing the joint contact by 800%. Our positive overlapping seal provides the most reliable protection available with a joint that will not be compromised, and we guarantee it.

**Primary applications include:**

*Residential:* Asphalt Shingles, Tile and Clay Roofing  
*Commercial:* Built Up Roofing, SBS and APP

FlashCo® Manufacturing, Inc. is a leading North American producer of roof flashings primarily focusing on non-ferrous metals such as; lead, copper, and aluminum. Non-ferrous means no iron which means no possibility of rust and greatly reduced rates of corrosion. When properly alloyed non-ferrous metals used for roofing are environmentally benign because of their low rate of release back into the environment.

FlashCo® is proud members of the National Contractors Roofing Association (NRCA), the Western States Roofing Contractors Association (WSRCA), the Asphalt Roofing Manufacturers Association (ARMA), and the Tile Roofing Institute (TRI).

FlashCo® Manufacturing, Inc. has relationships with regional and national roofing wholesalers. Please call for a distributor near you, (866) 323-5274.

Greg Morrow  
President
