Shown with Cap.

**Cut to Pitch Copper Flashing**  
with Cap.

**All Flashings Available in Standard Base & Shake Base  
Lead Flashings Available in Adjustable or Cut to Pitch**

It makes a lot of sense to provide FlashCo's newly designed pipe jacks because they will last as long as the roofing system. Lead and Copper Flashings have established a solid performance record and a reputation for lasting. These materials have minimal release back into the environment, this is the main reason they last so long.

Failing No Caulk Flashing.  
No Caulk is No Good!  
Notice "moat" where water can puddle.

## **ATTENTION: Asphalt Shingle Roofing Contractors**

Consider installing pipe flashings that give you a competitive edge. For a few more dollars per home why not install FlashCo® Lifetime Flashings? Your customers deserve the benefits of the FlashCo® Lifetime Flashing™ and you deserve the peace of mind.

**GUARANTEED FOR THE LIFE OF YOUR ROOF...**

**Call for a distributor near you.**

FlashCo® is a registered trademark and guarantees only the best material. FlashCo® uses high compression lead specifically alloyed for roofing and corrosion resistance. FlashCo® lead meets ASTM Spec. B 749-85
