

*FlashJack™***CONICAL CLOSED BOOTS**

PVC Low Slope Systems

OVERVIEW

FlashCo's FlashJack PVC Closed Conical Pipe Boots are Factory Certified prefabricated flashings made from 60 mil reinforced PVC membrane. These boots are cut-to-size during installation to snugly fit over cylindrical penetrations found on PVC low slope roofs. FlashCo's Closed Conical Boots come in a variety of standard sizes, designed to accommodate common cylindrical penetrations. Each Conical Pipe Boot is designed to fit a range of penetration diameters while maintaining a riser height of at least 6" or greater.

Custom Sizes and Colors Made to Order**INSTALLATION**

FlashJacks shall be installed in accordance with the recommendations and specifications of the roofing material manufacturer.

1. Prepare all welding surfaces by cleaning with PVC membrane cleaner.
2. Place flashing over penetration and mark where top of pipe is telegraphed on riser and remove.
3. Approximately ½" above the mark, cut-to-size the top opening.
4. Again, place flashing over penetration and mark top of flashing on pipe and remove.
5. Apply a bead of water cut-off mastic (provided by others) completely around the penetration just below the mark.
6. Replace flashing over the penetration and heat weld the base flange to the deck.
7. Install stainless steel hose clamp at top of flashing riser providing constant compression on the sealant.
8. After the flashing has cooled, probe welds to verify a secure bond.

**FEATURES AND BENEFITS**

- Up to 60% Labor Savings Compared to Field Fabrication
- Available for NDL and Discretionary Jobs
- Fit Multiple Sizes with a Single Flashing

SAVING THE CONTRACTOR TIME

- FlashCo strives to ship 90% of orders within 1-3 days after purchase orders are placed
- All major membrane manufacturer brands in stock in all five FlashCo plant locations
- Get off the roof sooner
- Reduce installed costs

Colors shown: White, Slate Gray & Dark Bronze
